

# 5 WAYS TO SUPPORT

## Aquacelerator's World Oceans Week Celebration

Engage in the conversation with #Aquacelerator.

### 1 Network-Centered Innovation on Display

Through the Aquacelerator, network-centered innovation has provided partners the tools and techniques to meaningfully engage with new partners, new ideas, and new resources in pursuit of a transformative vision centered on sustainable aquaculture solutions. We asked them to reflect on this vision and will share videos featuring this vision throughout World Oceans Day on June 8 (beginning June 8, 9am in Canberra, Australia). Visit [SecondMuse](#) on social media to see, share, and respond to these video clips.

### 2 Use the Hashtag

By following and using [#Aquacelerator](#) on Twitter throughout World Oceans Week, you can keep up with the conversation around the impact of the Blue Economy Challenge Aquacelerator Fellows, the challenges they are addressing, their impact, and their vision for the future of sustainable aquaculture. We want you to weigh in throughout the week using the hashtag to join a broader conversation about accelerating sustainable aquaculture.

### 3 Make A Commitment

We want YOU to engage with the ten Blue Economy Challenge winners. Throughout the week, follow the lead of organizations across the globe by making your own commitment to a Fellow, whether providing your connectivity, capacity, creativity, capital, or credibility. Visit [theblueeconomychallenge.com/commitments](http://theblueeconomychallenge.com/commitments) to learn more and get in touch.

### 4 World Ocean Festival

On June 4 on Governors Island in New York City, people from across the globe come together in support of the United Nations Sustainable Development Goal 14, which aims to promote conservation and sustainable use of the world's oceans. [Aquacelerator will be part of this](#), previewing a virtual reality film featuring Aquacelerator Fellows in Tanzania. In addition, between 10am and 11am EDT (June 9, 12am in Canberra), we will be featured on the [World Oceans Festival](#) Facebook page.

### 5 Virtual Reality Film Premiere

On World Oceans Day in the United States, *Making Waves: Re-engineering Aquaculture in Tanzania* will be released on 3pm EDT (June 9, 5am in Canberra) via the Facebook page of [Mission Blue](#), Dr. Sylvia Earle's Ocean Conservation organization, in coordination with an in-person gathering and panel discussion featuring the Australian Department of Foreign Affairs and Trade's innovationXchange and SecondMuse, hosted at SAP Next-Gen in New York City. Our panels will look at ways to push the boundaries of both technology and immersive communications for development in the pursuit of long-lasting, meaningful social impact. [Watch this live](#) 360/VR webcast from 2-4pm EDT (June 9, 4-6am in Canberra).
